ABOUT US

KSE...a new-age school for the present generation where education is students engaging.

The campus has world-class infrastructure with AC and digitized classrooms.

Our 3.5-acre campus is in the heart of the town with modern buildings and proper ventilation and smart classrooms (air-conditioned) with individual lockers.

The campus also provides a big playground to the Primary and Middle School Students to play after school hours and a small park for the Pre -Primary students to play under the guidance of the teachers during school hours.

WHY CHOOSE US?

The focus of the National Educational Policy (NEP 2020) is to enable the skills of 5C (Creative Thinking, Creativity, Collaboration, Curiosity, and Communication) in students.

To provide the students the New Age Education, KSE has adopted the **CBSE** curriculum of a reputed Ed Tech company which allows the students to learn concepts through different hands-on activities and through visuals and audio in addition to the books.

Our smart classrooms result in increased peer collaboration and student engagement and our regular assessment followed by remedial classes in each subject allows the parents to map the regular progress of their children.

Our teachers are regularly trained by the Academic Excellence team so that they can develop a good bond with students of various age levels and as well as seamlessly provide integrated technology-based education.

FACILITIES PROVIDED BY OUR SCHOOL

Education is informative and important but extracurricular activities help to sow and nurture the dreams of children."

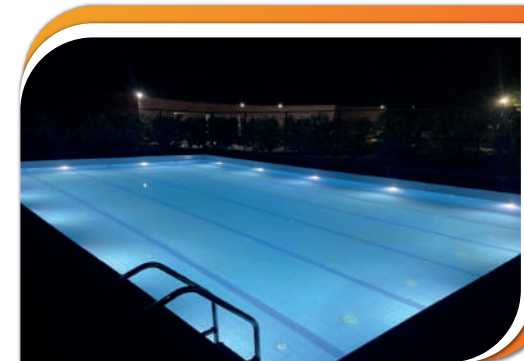

In KSE, the students get to choose various extracurricular activities which help them to develop their social, emotional, and physical strength.

ROBOTICS
MAKES YOUR
CHILD FUTURE
READY

The Robotics are easy and fun way to help students get interested to science and develop their critical thinking capability.

We teach Robotics in our school to help the students in improving their STEM (Science, Technology, Engineering and Math) skills and explore diverse learning paths like programming and creative problem-solving techniques.

WORLD CLASS
SWIMMING
POOL

KSE introduced the first athletic swimming pool in the vicinity for our children to develop psychological and physical strength. We have a world-class 2000sqft swimming pool with a trained coach and dressing rooms.

OTHER EXTRACURRICULAR ACTIVITIES

KSE gives scope for developing interest in other Extracurricular Activities such as Classical Music, Classical Dance, Western Dance, and Yoga
